

Nilfisk Walk-behind scrubber/dryer

Nilfisk SC350

Revolutionary deck concept, a new benchmark in small area cleaning

The new Nilfisk SC350 is not just another small scrubber dryer. It represents radical new thinking, and the kind of innovation only possible from an industry leader. The unique rotating deck concept, for example, integrates the squeegee into the deck itself.

This enables scrubbing and drying in all directions - either forward or backwards, with the water kept inside the brush deck while working.

Cleaning becomes faster, better and easier. Plus, the superb compact design and excellent manoeuvrability allows access to hard-to-reach areas that other machines can't clean.

At Nilfisk, we don't just design products; we provide solutions that truly meet the needs of our customers.

The innovative Rotating Deck concept is the key to outstanding scrubbing and drying performance.

SC350 can work normally frontward in all directions like a "normal" scrubber dryers. But as soon as it is required a quick input of the operator and the deck quickly rotates completely and the machine can be used for backward scrub&dry operations as well. With the new rotating deck, even hard-to-reach area become accessible.

The tanks can be removed quickly and easily, and can be filled, drained and cleaned away from the machine itself.

The brush and squeegee blades can be easily removed and cleaned/changed without the use of tools

The ultimate combination of innovation, reliability & performance

- Best-in-class performance and the first compact unit to clean AND dry going either forward or backwards.
- Cleans even hard-to-reach areas that are inaccessible to typical scrubber/dryers
- Low noise level enables daytime cleaning, even in noise-sensitive locations
- Optima batteries available: high productivity, constant performance, less weight, less lead, fast recharge capability
- Outstanding 27 kg of down pressure for excellent scrubbing effectiveness, the deck is easy adjustable as well, for a perfect traction control
- Ergonomic and effortless to use with virtually no operator training necessary
- Adjustable water flow feature with two optional settings
- All components are accessible quickly without the need for tools. Maintenance is fast and simple

The control panel is simple to understand and use. It offers 3 working mode options; scrub and vac – scrub only – vac only

Thanks to the compact design and foldable handle, the SC350 is easy to transport and store, even when space is limited

Low profile enables cleaning beneath tables and chairs

An on-board battery charger is standard on all versions. This saves time and maximizes productivity

A breakthrough in daily scrubber/drying

Foldable/adjustable handle makes transport and storage easy

On-board battery charger as standard

The brush and squeegee blades can be easily changed without the use of tools.

Two knobs beneath the tanks allow simple adjustment of the deck angle for more effective brush assistance and cleaning

Simple to use control panel has three operating-mode options

Transparent lid; easy to remove, complete control

The tanks can be removed quickly and easily

Rotating deck concept with integrated squeegee allows forward or backwards cleaning

Technical specifications

Description	Unit	SC350
Voltage	V	12
Rated power	W	450
Sound pressure level at 1.5m	dB(A)	64
Productivity rate theoretical/ actual	m ² /h	1480/890
Scrubbing width	mm	370
Max speed	km/h	4
Solution/recovery tank	litre	11/11
Brush/pad diameter	mm	370
Brush pressure	kg	27
Brush speed	rpm	140
Length x width x height (machine body) cm		73x43.5x47
Weight	kg	42
Operating weight	kg	72
