

Damon Bulk Service Eliminates:

- Liability from leaking and disorganized drums
- Expensive and limiting tanks
- Waste of unused chemicals
- Hours of labor for handling
- Late or unneeded deliveries
- Time lost during tank refills

Eliminate hazardous spills and the clutter of hazardous, residue-containing drums.

Damon Bulk Service Provides:

- One portable tote to give you product right where you want it
- An efficient dispensing system customized for your needs
- Prompt deliveries only when you need them

A tote is ready to be delivered to your location with a product meeting your exact needs. Contact us today to discuss your special needs with one of our representatives.

Bulk Chemical Program

DAMON

***More than just chemicals...
We provide solutions!***

Bulk Program Overview

The Damon Bulk Chemical Program is designed to provide you with an efficient, inexpensive, and hassle-free alternative to hazardous drums and limiting tanks. With our service, you will get all the product you need in a single tote that can go anywhere you want it. In addition, we can customize the tote precisely to your needs by adjusting the concentration, auto-dilution rate, dispensing rate, and much more. All these options, along with Damon's friendly and dedicated service, make the Damon Bulk Chemical Program the perfect solution to your chemical needs.

Why Bulk Service?

- Transforms drum storage space into productive work space
- Enables you to work where you want, not where your tank will let you
- No expensive tanks, maintenance, or messy drums
- Total customization to your needs enhances productivity and efficiency
- Paying only for what you use saves money and conserves inventory

Damon Bulk Features:

- Quick connection to water source
- Easy to reach on/off control
- Pre-assembled and ready to use
- Custom tailored to meet your needs

Simple hook-up and use.

Optional multi-dilution equipment available

Customization Options:

- 250 gallon basic size with others available upon request to fit your needs
- Specified concentrations to maximize efficiency
- Preset dilution system to reduce labor, ensure accuracy, and improve safety
- Variable output rates to fill spray bottles, buckets, scrubbers, and more
- Price and services tailored to fit your budget
