

Can-Do![®]

Ready-to-use Multi-Purpose Cleaner-Degreaser

DI-PHASE CLEANER - Versatile, fast-acting on both grease and dirt
READY-TO-USE - No concentrate to handle, safer for users
THE POWER OF BUTYL - Cleans tough stains that non-butyl won't
BUFFERED - Cleaning power stays constant from start to finish

Can-Do is a scientifically formulated, ready-to-use spray cleaner designed for use on most hard surfaces. It has a unique di-phase solvent system that will give you the maximum cleaning action on the most difficult soils and greases. Can-Do's versatility will help reduce both labor and cleaning product inventories. Use Can-Do for tough cleaning jobs in industrial plants, restaurants, schools, churches, nursing homes, hospitals, and anywhere water-based spray cleaning products can be used.

With Damon's special blend of detergents and boosters, Can-Do has the extra power needed to take on the grimeiest cleaning jobs - heavy frying grease, oil, ink, crayon, smoke film, food soil and stains, and graffiti. The unique formulation requires no rinsing, is non-flammable, dilutes with water, and contains no dangerous solvents.

Can-Do is the perfect cleaner for stainless steel, aluminum, chrome, Formica, vinyl, and other non-porous surfaces. Before use on painted surfaces, test in an inconspicuous area. Can-Do excels at removing smoky residues from ceiling light fixtures and non-porous window blinds. It degreases food service equipment and greasy filters quickly and easily. It also cleans greasy windows where regular glass cleaner fails.

READY-TO-USE FORMULATION

Can-Do is stabilized at the correct strength for multi-purpose cleaning (pH 12.5). There is no need to take time for mixing and measuring. And, there's no chance of mixing errors - that's safer both for cleaning

personnel and for surfaces.

UNIQUE BUFFERING SYSTEM

With a special buffered formulation, Can-Do stays active at effective strength for a longer period of time. Extended use means better and more economical product performance.

DIRECTIONS FOR USE:

Attach the trigger sprayer to the bottle and spray; no dilution is required. On normal soils, spray and wipe. On heavy grease or black marks, spray and allow to sit one minute before wiping. On rough surfaces, a second application may be necessary. Minimal protective equipment is necessary except when spraying above eye level. For additional information, see the Material Safety Data Sheet.

TECHNICAL DATA:

Color - light green
Odor - lemon fragrance
pH - 12.0 + 0.5

NFPA ratings: H:0 F:0 I:0
HMIS[®] III ratings: H:1 F:0 P:0

These ratings estimates are to be used only with a fully implemented training program in the workplace. NFPA[®] is a mark registered by the NFPA. HMIS[®] is a mark registered by the NPCA.

PACKAGING:

Quart plastic decanter bottles packed 12 per case with one trigger sprayer. Packaging material is recyclable.
