

Fine 'n' Shine™

Specialty Plastic Cleaner, Polish and Restorer

No solvents - Safe for any plastic or surface.

Proprietary polymer - Restores clarity to a degree, depending on the type of plastic and how bad the haze and scratches are.

Leaves surfaces static-free - dust is not attracted as quickly.

Easy to use and pleasant smelling.

Fine 'n' Shine is a remarkable cleaner designed to protect and restore clear plastics. It contains no solvents or petroleum distillates that can cloud, haze or cause craze cracking of plastics. Besides clear plastics it also cleans and polishes any plastic, Formica, glass, metal, tile or painted surface.

Fine 'n' shine also contains a proprietary ingredient to help restore the clarity of plastics that have been cleaned with the wrong chemicals. Moderate hazing and light scratches are made less visible. Sometimes results are amazing, other times not so visible. It depends on the plastic and the severity of the damage. At the very least, the damage will not get any worse because you are using the safest cleaner.

Surfaces polished with Fine 'n' Shine are neutralized to attract less dust. This is especially helpful for museum and gallery displays with plastic protection or cases.

WHERE TO USE

- Boats
- Motorcycles
- Aircraft
- Salad bar protectors
- Display cases
- Dashboards, instrument panels
- Plastic windows and doors
- Eyewear, goggles, safety glasses
- Glass doors, brass hardware
- And a multitude of other places

Do away with clouding, scratches, finger-prints, dust and grime. Spray a mist of Fine 'n' Shine on the surface and polish it dry. You instantly restore the shine and insure longer service from your fixtures and equipment.

In the marine field, Fine 'n' Shine cleans those cloudy side and aft curtain windows or "eising glass". Now you can feel safe and sure with improved visibility during storms. Great for

windshields and instrument panels too.

Fine 'n' Shine gives motorcyclists and snow-mobilers clean and haze-free windshields. Bugs are easier to clean off too. Don't forget to use Fine 'n' Shine on your helmet visor and goggles.

With its solvent-free formula, Fine 'n' Shine meets the test for aircraft canopy cleaning. Improves vision and prolongs the life of materials for safety and economy.

Building maintenance - Having problems with acrylics, Plexiglas, Lexan® and other plastics? And what about glass doors and brass push-plates? Fine 'n' Shine not only cleans these with ease, it leaves a molecular barrier that helps reduce finger-smudging. It also shines Formica, wood and painted surfaces as well.

The plastic guard over salad bars, the "sneeze guard", will stay smudge-free longer when cleaned and polished with Fine 'n' Shine.

SPECIFICATIONS

pH	10.5
VOCs (volatile organic compounds)..	0.2% - 2.1g/l
Color	pink
Odor	mild
Toxicity	low

PACKAGING

One quart plastic bottles packed six per case with one trigger sprayer. All packaging material is recyclable.
