

**Introducing New Simple-To-Use Environmentally Friendly Sanitation Program from Damon Industries, Inc.**

**Read what some of your associates have to say about this cost cutting program.**

John Enos  
Owner of J & K Angus

J & K Angus had tried a few different programs that did not really work for them, and they were wasting a lot of chemicals. Owner John Enos called Craig from Damon Industries when they ran into a problem with some bacteria; the problem was resolved the next day. The Da-

Clean A.P.C. Sanitation Program is so simple that anyone can use it without the fear of someone getting hurt. "Our floors are cleaner, the drains run better, and our plant smells better." John said, "we are saving so much money by using this program. Not to mention the great service."

Wayne Plotts  
Owner of  
Charlanne Farms

Wayne is the current president of the Ohio Association Meat Processors (OAMP)

Wayne admits they are using less chemicals, and their drains have not plugged since the change to the Damon Industries Program. "These products are much safer for my employees and the environment. Damon products do a great job as far as cleaning the equipment, floors, and walls. As well as keeping the shop smelling better."

Paul, Meat Cutter/Sanitation  
Dutch Creek Foods

Eric Raimy, Sanitation Director at Dutch Creek Foods, states, "it is a simple, easy program to follow, no mixing, no mess, no waste of chemicals, the right dilution every time. Our bacteria counts are down. We haven't had any [time] loss work from chemical accidents, and everything smells better."

"No more drain problems and no expensive protective clothing to buy. Our expenses for chemicals has been cut in half since going with Damon Industries, and the service is excellent!"

**You can begin to experience these benefits.  
Please call Brent or Diane for your Start-Up Kit.**
