

Fur Clean™

Deodorizing Pet Shampoo

Gets rid of skunk and other nasty odors

- Shampoo, Conditioner and Detangler
- Safer than hydrogen peroxide for skunk odor removal, doesn't bleach fur
- Rinses easily and completely
- Light pleasant fragrance
- Extremely mild, neutral pH
- Destroys odors naturally

The Regular Grooming Aid That Removes Skunk Odor Too!

Fur Clean is a revolutionary deodorizing shampoo using new enzyme technology developed by Damon Industries. The story begins with a specialty non-hazardous cleaner-deodorizer for meat processors. A Damon employee's dog had a skunk encounter, and desperate to get rid of the odor, he tried a sample of the meat department cleaner. He was amazed at the results. The news spread and a demand for "samples" developed, leading to a product combining a specially formulated shampoo with the odor control enzymes. Many pet-loving employees tried the shampoo and made suggestions for improving it. Fur Clean was born.

Fur Clean neutralizes odors by digestion, just like your saliva and digestive juices do. No licking necessary! The enzymes digest the odor-causing molecules by breaking their chemical bonds. The result is water and simple molecules that do not smell. There are no harsh chemicals or masking agents to irritate skin or pollute the environment. The odor neutralizers are combined with a mild shampoo and conditioner to make de-skunking as pleasant for you and your pet as possible. Pet owners and groomers have told us that Fur Clean is a better shampoo than many regular shampoos. It is pH balanced and rinses easily

leaving the coat detangled, soft and shiny. The fragrance is very light, and there are no dyes added. No product is completely irritant-free, but we did our best to limit them. There are no cancer-causing ingredients either. So keep your hydrogen peroxide for cuts, and your tomato juice for drinking (it only fools your nose anyway) and deodorize the safe, pleasant way, with Fur Clean. Don't just keep it on hand for emergencies, use it every shampoo-time for a fresher-smelling pet.

Directions: Saturate your pet's fur with warm water and then squirt enough Fur Clean onto your pet to work up a nice lather. After lathering, let it work for 3 to 5 minutes so the shampoo can break the chemical bonds of the odor molecules. Rinse well. Repeat if necessary. Works best with warm water. Avoid contact with your pet's eyes. You wouldn't like it in yours. Use a sponge or cloth to apply it to its face.

Ingredients: Alkylpolyglucoside, amine oxide, propylene glycol, ethoxylated coco mono- & diglycerides, benzoic acid (to balance pH) and enzymes. Contains no sodium lauryl sulfate.

Packaging: One pint bottles with squirt cap. Available as a single bottle or six bottles per case. All packaging is recyclable.

Made in the U.S.A.

What are people saying about Fur Clean?

"It is awesome. It rinses out easily and really does work on "doggie" odor. There is no wet dog smell when I'm finished. I like this shampoo! My Doberman's short, bristled fur is so soft when I'm done. I get a lot of compliments on how slick and shiny his coat is."

Amy G., Louisville, Ohio

"I used the shampoo three times on dogs. I've had experience with skunk shampoos, and the problem with the majority of skunk shampoos is that they are

usually harsh and dry out the animal's skin. Fur Clean is gentle enough that it does not dry out the skin, and the conditioner helps in combing out the dog. One of the (very large) dogs was terribly snarled and matted. The shampoo not only got rid of the bad smell, detangling the dog was much easier."

Groomer, Alliance, Ohio

"Great fragrance. Excellent performance and ease of use." - Patricia A. Tucker, Alliance Animal Hospital, Inc.

OTHER DAMON PRODUCTS THAT MAY BE OF INTEREST

WINTERFECT® III

Winterfect has been one of Damon's best selling products for over 40 years. It has been a favorite of veterinary clinics and breeders because of the wintergreen fragrance. A new formula brings Winterfect into the 21st century. The new product is effective against many more germs than the previous formula and is one of the most broad range disinfectants for animal care facilities on the market today.

Winterfect III is a concentrated, 2-ounce per gallon, hospital-grade disinfectant that utilizes the latest synergistic quaternary blend. It exhibits high soil and hard water (400ppm) tolerance with good cleaning performance. Winterfect has been proven effective against over 84 organisms and is EPA registered. Some of the animal pathogens killed are Avian influenza A, Canine distemper and Feline picornavirus. At 8 ounces per gallon Canine parvovirus (CPV) and rabies virus. The product also kills a broad spectrum of human pathogens such as Hepatitis and antibiotic resistant strains such as MRSA and VRE. For the complete list see <http://damonq.com/TechSheets/WF-NS-64-KillClaims.pdf>.

Winterfect is for use by nursing homes, hospitals, animal breeders, veterinarians, schools, athletic clubs, food service, industrial, restaurant, meat processors, Dairies, Farms and Households. Winterfect III is a pink liquid with a mild wintergreen fragrance, a pH of 6.0 - 8.0 and no flash point. It is packaged in gallon jugs (4 per case) and larger sizes also. The same formula is available with a light floral fragrance under the name **Neutra-Stat® 64**.

WINTER-FRESH™

Winter-Fresh is a deodorant-only companion to Winterfect for those who want more wintergreen smell. In order to be a high level disinfectant, Winterfect III cannot have very much fragrance. Winter-Fresh can be used after disinfecting with Winterfect following the EPA directions on the label. Winter-Fresh cannot be added to the Disinfectant because that would violate EPA rules and nullify the disinfection claim. Winter-Fresh also works well as a stand-alone deodorant. Use 2 to 6 oz./gallon of water. Effective on odors caused by urine, feces, vomit, smoking, animals, spoiled food, and drains. Packaged in quart bottles (12 per case), gallon jugs (4 per case) and larger containers also.

Da-Clean™ Neutral Cleaner

The same enzyme technology as Fur Clean for general cleaning and carpet extraction to remove urine and other odors. Cinnamon fragrance. Dilutes 1 oz./gallon of water. Packaged in gallon jugs (4 per case) and larger sizes.

Da-Clean™ A.P.C.

The original Damon enzyme technology for heavier cleaning and deodorizing. Breaks down fats as well as urine and other odor-causing materials for general cleaning and carpet extraction. Mild herbal fragrance. Dilutes 1 to 3 oz./gallon of water. Packaged in gallon jugs (4 per case).

Stress-Relief™ Deodorant

This is our version of the popular deodorant from that very big company. Counteracts odors at their source rather than just covering them up. Pleasant fragrance that everyone loves. Packaged ready-to-use in quart bottles (12 per case) with trigger sprayer.
