

PERFECT ORANGE™

Peroxide & Orange Cleaner

- Removes stubborn spots & stains from fabrics and surfaces
- Economical concentrate dilutes many ways for many jobs
- Pleasant fragrance and user friendly formulation
- Removes Quat. residue and browning from floors and mops

Perfect Orange cleaner is a unique blend of a peroxide stain remover and d-limonene cleaner-degreaser giving you two products in one. Instead of trying everything in your closet on spots and stains, reach for Perfect Orange cleaner first. In most cases it will be the only product you need. Save time and closet space.

Hydrogen Peroxide is a proven stain remover that will not harm most fabrics and dyes. It is much safer on fabrics than bleach and much less hazardous to workers.

D-limonene is a derivative of natural citrus products and is often referred to as nature's degreaser. It works on many solvent-based stains thus complimenting and enhancing the peroxide. This dual attack is surprisingly effective on many hard to remove stains such as blood, grease, soft drinks, juices (including some red drinks), inks and many others.

Perfect Orange cleaner also rinses very free, leaving no residues to attract dirt or dull surfaces. Both ingredients act as deodorants, breaking down many odors and masking others.

Perfect Orange cleaner is excellent for removing film and brown stains on hard floors caused by quaternary ammonium disinfectants without harming the floor finish. It also removes brown stains from mops.

Perfect Orange is an excellent degreaser for kitchen floors. It removes grease and prevents it from being tracked into dining areas. The peroxide gradually whitens grout with regular use.

As a laundry additive it whitens, removes many stains, and softens laundry. It removes stains from Ensure and similar products. The use of bleach may be eliminated or reduced which lengthens the life of linens.

Perfect Orange cleaner is very user friendly with a neutral pH and low toxicity.

Peroxide breaks down into oxygen and water while the d-limonene is biodegradable. It has a low VOC content and no flash point to worry about.

Directions:

Floor Cleaning & Stain removing:

May be mopped on or used in an auto scrubber. Leaves finished floors very glossy and bare floors squeaky-clean..

- 6 ounces per gallon of water - Regular floor cleaning, odor removal from bathroom floors, removal of quat. film.
- 10-15 ounces per gallon of water - Removes heavy quat. residue and brown stains on floors.
- 20 ounces per gallon of water - For extreme cases of brown staining.

Laundry: Two cups added to the first cycle per average load, or the equivalent in commercial machines. Perfect orange cleaner may also be used as a laundry spotter by spraying onto stains.

Carpet Spot & Stain Removal:

Spray full strength directly onto stains as a pre-spotter before extracting. May also be used for manual spot cleaning. Spray directly onto the stain and blot up. Always test in an inconspicuous place first.

Packaging: Gallon plastic jugs packed 4 per case. Labeled spray bottles available.

Contact your Damon representative for a complete carpet cleaning program, complete laundry program and a complete hard-floor program.
