FLOOR MACHINE BRUSHES FOR ALL BRANDS

3M FLOOR BRUSHES

Unique wedge pattern cleans floors more effectively. Does a tough cleaning job on everything from grouted floors to concrete. There are five types of brushes to choose from to meet your specific needs. The universal attachment lets you switch from brush to floor pad in seconds utilizing one pad drive. These can be used effectively on both rotary floor machines or automatic scrubbers. Sizes from 10" through 22" are available.

ZIM-GRIT BRUSHES

A new concept in floor care. These brushes come in six grit types. One Zim-Grit brush outlasts 100 floor pads for a fraction of the cost. Ideal for concrete, terrazzo, quarry tile and resilient tile floors. Sizes from 10" through 22" are available.

BRUSHES

A full range of brush fillers are available to suit your needs. Backings can be made of natural wood or synthetic wood. Most types of brushes are available with pre-drilled holes (Shower Feed) for cleaning solution to feed to the brush. Sizes from 10" through 22" are available.

- Bassine** - For light stripping and general scrubbing.
- Tampico** - Soft to medium durable bristle for high luster polishing.
- Union Mix** - For general floor buffing.
- Polypropylene** - Synthetic fiber, great durability, for wet scrubbing.
- Steel Wire** - For scarifying concrete floors.

CLUTCH PLATES

Factory clutch plates insure trouble free replacement operation. All die cast and precision made. Always specify machine number and model number when ordering. Clutch plates are available for a wide variety of floor machines.
