

# INDUSTRIAL AND BENCH MAINTENANCE AEROSOLS

**CONTACT & CIRCUIT BOARD CLEANER II, SSS** – A fast drying, nonflammable, residue free formulation. For rapid and safe removal of dust, dirt, grease and oil from contacts points, switches, vending machines, signal boxes, telephone equipment, circuit breakers, relays, tuners, and precision tools. Non-flammable, 26,000 volt dielectric constant. Dries residue free, will not affect plastics or rubber and will displace moisture. Reduces arcing, downtime and labor. Packaged 12 - 16 oz. volume cans per case.

**MOISTURE GUARD II, SSS** – A special multi-purpose product that is formulated to lubricate, penetrate, displace moisture and prevent corrosion without the use of ozone depleters or chlorinated solvents. Non-greasy lubricant for factories, machine shops, garages, utility companies. Also included are high concentrations of corrosion inhibitors. Packaged 12 - 16 oz. volume cans per case.

**PENETRANT LUBRICANT, SSS** – A highly concentrated organic and biodegradable blend that quickly penetrates and loosens rusted and frozen parts. Frees frozen and rusted nuts and bolts quickly and easily. Special additives enable this formula to lubricate by leaving a residual film that also displaces moisture. A real labor saver in the automotive, textile, plumbing, machine, construction, sewage and electrical industries. Lubricate and protect gauges, pipes, nuts and bolts, brake cables, locks, motor blocks, air driven tools, battery terminals, gas and water meters. Packaged 12 - 16 oz. volume cans per case.

**SILICONE LUBRICANT II, SSS** – A high viscosity, heavy duty silicone. It is specially formulated to provide superior all-purpose lubrication and protection without the use of ozone depleting chlorinated solvents. Use this product on moving parts, as a water and weather barrier, as an electrical insulator, and to prevent sticking, squeaking and freezing of doors, windows, locks and assemblies. Prevents rubber from becoming brittle. Excellent for door locks, cutting tools, saw blades, snow shovels and plows and diving equipment. Use in machine shops, transportation departments, garages, utilities, food packaging plants, hospitals and many other industries. Safe for use on virtually any surface. Packaged 12 - 16 oz. volume cans per case.

**SLIP-SHOT II, SSS** – A multi-purpose lubricant that sprays out of the can as a thin, penetrating liquid and quickly becomes a thick red grease capable of clinging to vertical surfaces. Contains additives enabling it to cling and not "throw off" in use. Contains rust and corrosion inhibitors, anti-wear additives, and agents to improve adhesion and cohesion. Withstands heat to 500 degrees F. Resistant to water and acids. Ideal for automotive, aircraft, construction, hospitals, utilities and machine shops. This formula lubricates, prevents oxidation, and prevents rust without the dangers of ozone depleting chlorinated solvents. Packaged 12 - 16 oz. volume cans per case.

**SOLVENT CLEANER & DEGREASER, SSS** – A bio-degradable natural terpene degreaser in an aerosol can. Works well at removing grease, oil, adhesives, waxes, gum, inks, tar, asphalt, and resins. Also works well on motors, printing equipment, air filters, signal boxes, generators, engines, and refrigeration equipment. Packaged 12 - 16 oz. cans per case.

• **INDUSTRIAL AEROSOL PERFORMANCE PACK** - Combine any three SSS Industrial Aerosols to make a case of 12.

**MISTY SUPER SOLVE** – One of the most powerful industrial solvent degreasers available. The perchlorethylene and trichlorethylene base makes this a fast drying, non-flammable, non-conductive degreaser. Can be used on live electrical equipment. The dual action valve allows you to blast spray for hard to reach areas and a misting spray for large areas. Packaged 12 - 16 oz. volume cans per case.
