

SSS POLYESTER FLOOR MACHINE PADS

SSS polyester floor machine pads are constructed of high quality, extra-strength, high porosity fiber. They are then saturation coated to produce a very durable, load resistant pad. A money saving pad to buy - a top quality performer to use.

SSS WHITE FINE POLISH PAD - Designed to deliver a high gloss, fine polish appearance, comparable to a lamb's wool bonnet. Picks up light surface dirt and removes light scuffs while giving a smooth, even, high gloss finish. Use dry or with a fine water mist. Resists loading and quickly cleaned. For 175 - 600 RPM.

SSS RED BUFFING PAD - For spray buffing or light wet scrubbing of light to moderate traffic areas. Produces a smooth floor finish that resists scuffing while shining the floor to a high luster. Cleans when used wet and buffs when dry. A durable long lasting pad for 175 - 600 RPM.

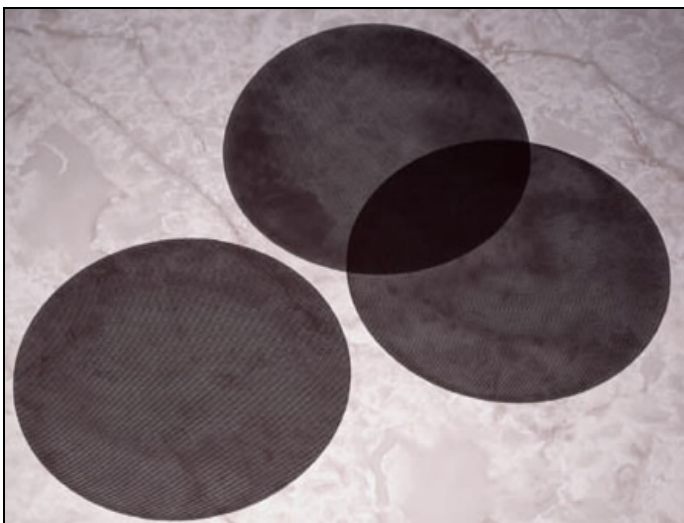

SSS BROWN STRIPPING PAD - An aggressive floor pad designed for stripping operations. Strips quickly and easily. Porous design for minimum loading and ease of cleaning. The saturation coating results in a pad that retains the aggressive design for the life of the pad. For 175 - 600 RPM machine.

SSS BLUE CLEANING PAD - Specially constructed for the most difficult heavy duty spray cleaning. As a scrubber it removes dirt, spills and heavy scuff marks in high traffic areas. As a spray cleaner, the pad cleans and leaves a satin finish. For 175 - 600 RPM machines.

SSS BEIGE BURNISHING PAD - A polythermal pad designed specially for burnishing with 1500 - 3000 RPM propane and gas powered machines. May be used on other high speed burnishers in special cases. Gives the high gloss "wet look".

SSS BEIGE BUFFING PAD - A polythermal pad designed to improve the results obtained with battery and electric powered 1500 - 3000 RPM machines. Produces a glossy "wet look" comparable to that obtained with propane machines.

SSS YELLOW HIGH SPEED PAD - A high speed spray buffing pad with a more open and porous design to help resist loading and give ease of cleaning. Use with 600 - 1500 RPM machines.

3M Scotch Mesh Screen Discs

Primarily used for wood floor preparation. Use the finer grits for preparing an old surface for recoating. Coarser grits are used for removing more finish and in repairing floors.
