

# The Ideal Matting System

No dirt gets past the entrances or the parts of the building where it is generated. Dirt is what dulls and wears off floor finish and requires stripping and recoating. Dirt is what soils carpet and cuts the fibers causing it to wear out sooner.

## Did you know.....

- It can cost \$500 to remove one pound of dirt after it has been tracked into a building?\*
- Up to 24 pounds of dirt can be tracked in by just 1,000 people coming through an entrance in a 20 day work month?
- 42% of floor finish can be removed within the first six feet of an entrance without adequate matting after 1,500 people have walked in?
