Mark,

I hope this note finds you well. I'm sure that you are aware of my passion for using the Damon Chemical Program. The program works well for the stores in the Carolinas. The most recent quarter that ended 3-30-09 Piedmont Pizzeria went 6 for 6 with all of our stores Gold Certified (it is my understanding that this is rare when an entire district goes gold). Obviously there are many factors that helped operations reach this goal. The Damon program is a critical piece of this intricate puzzle. Product quality and service are outstanding. I personally have used Damon products dating back to 1972 while working for Burger Chef in Central Ohio (I know I'm old). As you know operations is difficult enough with out fighting the cleaning chemical quality battle. This is one item I have checked off of my operations "to do list" as I can't imagine partnering with any other cleaning chemical company. I hope that you will consider converting all your stores to the Damon Chemical Program.

Regards,

Mark Ourant
