- Convenient Spray-Thru Cap with Ultra-Fine Spray Pattern
- Approved for Use in Food Prep & Food Processing Areas
- Kills Flies, Mosquitoes, and Many More Insects Listed On Back Panel
- Non-Staining, Water-Based, Nonflammable

Description

This product represents the next generation in aerosol insecticide technology. By combining 0.2% Prallethrin with dual synergists in a water base, this formula is effective on a broad spectrum of flying insects. In addition, the low overall toxicity of this new active ingredient allows the product to be used extensively in food prep and food processing applications as well as non-food areas. The low VOC content also allows for this product to be compliant in all 50 states. For ease of use, the product features a spray-thru cap and ultra-fine spray pattern for extended suspension time in air spaces. 20 net 16 oz can.

Demonstrations

Obtain a can of SSS Flying Insect Spray and a paper towel.

1. As with all EPA products, take the customer through the label and point out all insect claims and applications cited within the text.
2. Spray product toward a ceiling light and point out the ultra-fine particles as well as how they stay suspended in air for extended periods.
3. Spray can onto towel from about 12 inches. Note nonstaining.
4. Ask customer to smell towel. Note near odorless.
5. Ask customer to hold can and spray in air again. Note ease of use of spray through style cap.
